### Physical Education Core Years 10 and 11

Due to facility restrictions, it is impossible for all PE classes to study the same activity as each other at the same time throughout the year. We also acknowledge that different groups of students have different sporting interests, therefore we operate on a facility carousel, in which the students opt for the activity they wish to perform during each unit, based on the range of activities that are appropriate to their allocated teaching space. Throughout the Autumn and Spring terms, students participate in 4 activities across the range of National Curriculum themes. During the summer term all students concurrently participate in Athletics and a Striking and Fielding game, as our facilities do allow for these activities to be taught at the same time as each other.
